Thomas Juma

Senior Software Engineer | AI & ML Specialist | Cloud Infrastructure
(AWS & Kubernetes) | Fintech & Payments | Software Craftsman
Kenya

Summary

My primary interest is working on data. I engage in exploring data, creating models and visualising data using statistical methods and other techniques. This is well applicable in common scenarios especially in business and IT where a data problem can be solved using machine learning solutions. That notwithstanding, I am also into front-end development using frameworks such as Angular for rich user or customer interactions and experience on devices.

Experience

Cellulant

3 years 11 months

Senior Software Engineer

December 2022 - October 2025 (2 years 11 months)

Software Engineer

December 2021 - December 2022 (1 year 1 month)

Nairobi, Kenya

TECHSAVANNA TECHNOLOGY
